Transform your Calprotectin testing with the market leading provider. (As determined by NEQAS returns)

With rapid, clean and consistent sample preparation every time, the BÜHLMANN CALEX® extraction device will improve workflow efficiency whatever your calprotectin requirements:

- Quantum Blue® point of care calprotectin enables simple sample preparation by patients with the CALEX Cap
- CALEX Cap devices can be directly loaded onto DS2’s for BÜHLMANN fCAL® ELISA
- CALEX Cap devices can be directly loaded onto many clinical chemistry platforms for BÜHLMANN fCAL® Turbo
- IBDoc® Calprotectin self tests use the CALEX valve for a simplified test process

Join the Calprotectin EVOLUTION

Future proof your Calprotectin testing with BÜHLMANN Assays

- **IBDoc®** patient self-testing for IBD monitoring
- **Quantum Blue®** - Point of care testing
- **fCAL® ELISA** - High throughput laboratory testing covering the range 10-1800µg/g
- **fCAL® turbo** - High throughput turbidimetric assay for clinical chemistry platforms 20-8000µg/g

BÜHLMANN Calprotectin
- *For all your testing requirements*
  - Quantitative
  - Standardised assays for consistent results
  - Simplified sample preparation using CALEX extraction devices
  - Scalable
  - Flexible
